

Model BI Pushbutton Front Mount

Model BI is a bi-directional push indexing front mount switch 0.30" in width. Similar to our Model II and AI switches but smaller in size. Features snap-in panel mounting. Pushbuttons above and below the legend allow the user to add or subtract from the count. Available in most popular 10-position codes. Options and accessories include: Extended boards for diode suppression, Stopping, Blank Bodies, Endplates and Connectors.

Model BI

DIMENSIONS IN INCHES
